

Project Manager for Transaction team with Renewable Energy Company

European Energy A/S is a Danish based company that operates within the entire value chain of renewable energy, from the development of green field on-shore wind and solar PV energy projects, the construction and operation thereof, to the repowering and partial sell-off to financial partners such as institutional and private investors. We have currently installed renewable energy projects in Germany, Spain, Bulgaria and Italy for an investment value of more than DKK 3 billion. Consolidated revenue for 2010 reached DKK 440 million. In 2010, the Group achieved a satisfactory result after tax of DKK 34 million. The equity amounts to DKK 298 million. The company was founded in 2004 and employs 36 people, all located in Forskerparken Scion at DTU in Kgs. Lyngby. For more information please go to www.europeanenergy.dk.

For our HQ in Copenhagen, we are looking for a Project Manager to support our Sales & Transactions Department. You will become part of a dynamic and engaged environment where you will work closely with a team of international colleagues that have a varied professional background. We expect that you have the ability to manage projects in complex settings with many stakeholders, that you have strong coordination skills and are able to motivate project participants in your transactions processes. You have a flexible approach to various challenges engaged with and handle them with a high degree of curiosity. You are highly self-driven, have the ability to structure your work and have the ambition to go the extra mile in order to succeed. You are characterized by your extrovert personality, good sense of humour and enjoy working in teams.

Responsibilities and tasks

As Project Manager you will be referring to our Director of Sales. Your areas of responsibility will among others include developing and presenting business cases/valuations for possible investors, seeking business opportunities by establishing relationships with possible professional and institutional investors within Denmark and abroad. You will in cooperation with our Product Manager be responsible for the completion of transaction processes from A-Z. Specifically you will establish relationship with investor representatives, define transaction structure with investors as well as internal and external advisors, coordinate with internal and external specialists, structure and manage the transaction process for all involved parties and manage the negotiations. In short you will be responsible for executing the entire transactions. The job also entails a broad variety of ad hoc valuations on various wind- and solar PV projects.

Qualifications:

- You have very strong financial and analytical skills
- You have an advanced university degree in Business/Economics, e.g. Cand.Merc., Cand. Polit., MBA or similar
- You have 1-3 years of experience within the renewable energy sector, experience within M&A and/or from the financial industry
- You have an international background and mindset
- You have strong oral and written skills in English
- Strong proficiency in Danish and German are preferable
- Italian and Spanish language qualifications are seen as an advantage, but is not a requirement

Start Date: As soon as possible

Apply for the position: Please submit your application including a CV and a motivational letter at hur@europeanenergy.dk and mark it "Project Manager Transaction team". Applications can be in either Danish or English and will be reviewed on a continuous basis.
