

Internship in Renewable Energy Company

European Energy A/S is a Danish based company that operates within the entire value chain of renewable energy, from the development of green field on-shore wind and solar PV energy projects, the construction and operation thereof, to the repowering and partial sell-off to financial partners such as institutional and private investors. We have currently installed renewable energy projects in Germany, Spain, Bulgaria and Italy for an investment value of more than DKK 3 billion. Consolidated revenue for 2010 reached DKK 440 million. In 2010, the Group achieved a satisfactory result after tax of DKK 34 million. The equity amounts to DKK 298 million. The company was founded in 2004 and employs 39 people, all located in Forskerparken Scion at DTU in Kgs. Lyngby. For more information please go to www.europeanenergy.dk.

For our HQ in Copenhagen, we are looking for an intern with a legal background to complete a 6 months paid internship in our Project Department. As an intern you will become part of a dynamic and engaged environment where you will work closely with a team of international colleagues that have a varied professional background. We expect that you work independently and follow your tasks from start to finish. As a person you have a strong personal drive and handle your areas of responsibility with a systematic and structural approach. You have an outgoing and optimistic personality and have no problems with taking contact to strangers. You work proactively and strive by taking the lead when solving any task. In addition you will have the chance to learn and evolve in an international company, which is unique in the field of renewable energy.

Responsibilities and tasks

Your areas of responsibilities will among other things include reviewing existing land lease agreements and plot lists in three German wind farms, preparing and organising the transfer of land lease agreements as well as the correct registration of easements connected to these land lease agreements, coordinating time of signatures with German notaries and landowners, oversee registration progress of easements and handle all written and oral contact with the landowners.

Qualifications:

- You are currently undergoing your Masters degree or recently graduated
- You have some legal experience or knowledge within the field
- You have excellent communication skills
- You enjoy and find it natural to take contact to strangers
- Proficiency in both written and verbal English and German is a requirement

Start Date: As soon as possible

Apply for the position: Please submit your application including a CV and a motivational letter at hur@europeanenergy.dk. Applications can be in either Danish or English and will be reviewed on a continuous basis.
